

# AROUND THE WORLD

As summer approaches, MKU schools are preparing for summer fun! Our students will take a voyage around the world. They will be given the opportunity to explore each culture through hands on provocations, sensory experiences, science, art and more!

Montessori Kids Universe Around the World Summer Program includes:

- Science
- Technology
- Art
- Engineering
- Mathematics
- Geography
- History
- Special Guests

Every book, sensory activity, math challenge, and piece of art serves to immerse each student into cultures found around the world.

Each student will have an individual passport that will be stamped with each new country we explore!
